

Clinitude

Unveiling Excellence in Cardiovascular Studies

OUR EXPERIENCE

For almost 20 years in the industry, Clinitude has been at the forefront of cardiovascular research, delivering efficient and customized clinical trial solutions to our valued partners and clients.

A significant portion of our study portfolio is dedicated to cardiovascular studies, showcasing our commitment and expertise in this therapeutic area. This focused dedication keeps us attuned to the emerging trends, and fosters valuable connection with key opinion leaders and site investigators, ensuring that our solutions remain effective and impactful.

CASE STUDY

Global Registry Rescue Study

350 sites, Target Enrollment: 37000 subjects

Because the primary CRO has not made sufficient progress in subject enrollment, data review, meeting deadlines, and poor site and budget management, a major medical device sponsor has tasked us with rescuing a global cardiovascular registry study

CHALLENGES

- Huge backlog of data review, poor quality and missing data
- Sites' lack of engagement and motivation
- Clinical Adjudication process
- Budget constraints

OUR SOLUTIONS

- Assessed project status, timelines, and budgets to identify key study challenges.
- Introduced the 'CRA Liaison' to serve as a central monitor and facilitate communication between CRAs and sites.
- Strengthened patient recruitment through branding.
- Collaborated with data management for data cleaning and tracking missing data.
- Streamlined adjudication process.

OUTCOMES

- ✓ Increased Data Quality
- ✓ Increased Site Engagement
- ✓ Subject Enrollment Completed 1 Month Early
- ✓ Increased Adjudicated Events
- ✓ Within the Projected Budget

AT A GLANCE

1 / 3

One-third of our portfolio comprises cardiovascular studies.

50,000 +
Enrolled Subjects

400 +
sites globally

Study Phases

Indication

Post-Marketing 40%

Phase II/III 30%

Interventional 30%
