

Clinitude

Navigating through Oncology Clinical Studies

OUR EXPERIENCE

With nearly two decades of industry expertise, Clinitude has remained at the forefront of clinical research, providing tailored and effective clinical trial solutions to our esteemed partners and clients.

Throughout our extensive experience, we have navigated a range of complexities and challenges in conducting clinical trials from the unique perspective of a CRO, leveraging our expertise to drive successful outcomes.

OUR SERVICES

Project Management | Data Management & Statistics
Site Management | Regulatory
Feasibility & Site Selection | Strategic Advice | QA Services
Clinitude Integrated Site Support Services (CIS2)

CASE STUDY

Matched Paired Analysis in Hepatic Cancer

Several European Countries

A re-certification of Sponsor's product was required, with a tight deadline looming. To meet the request, a seamless collaboration was necessary between the Sponsor, CRO and respective clinical trial sites.

CHALLENGES

- Busy time schedule of Clinical trial investigators/sites
- Trial Sites required extra support due to logistical issues
- Tight timelines for the trial execution
- Retrospective data collection: will all data be available?

OUR SOLUTIONS

- Active collaboration Sponsor statistical team, Clinitude CRA and Site Support Services, our strengths were combined
- Where it was required our Site Support Team (CIS2) ensured completion of eCRF according to all quality standards and requirements
- Streamlined regulatory process to ensure proper submissions and communications with the sites EC's/IRB's if applicable
- Ensuring good communication and collaborations with the sites

OUTCOMES

- ✓ Increased Data Quality
- ✓ Quality Data timely available for Sponsor
- ✓ Sponsor was able to submit their dossier well in time
- ✓ Re-Certification was received within a few weeks after dossier submission
