

CLIN-TELLIGENCE

"Empowering Clinical Trials with Scalable IT & AI Solutions"

WHO WE ARE

CLIN-TELLIGENCE is a division within Clinitude (a clinical trial solution provider) of AI and software developers dedicated to building tools that help clinical trial professionals work smarter, faster, and with greater confidence.

What This Means for You as a Sponsor

Running a trial is complex, resource-intensive, and highly regulated. Our role is to **simplify your workflows** so your teams can focus on science and patients rather than paperwork. We **transform bottlenecks** in clinical research into streamlined, intelligent, and scalable processes.

Why Partner with Us

Clinical-First Mindset - we understand trials before building tools

Practical Focus - solutions that optimize productivity, shorten timelines and cut costs.

Flexible Engagement - from pilots to enterprise-level deployment

Co-Creation - tools designed hand-in-hand with your teams

Examples of How We can Deploy AI for You

CLINWright (AI Clinical Writing Assistant)

Our generative AI tool streamlines the drafting of clinical research documents, including case/ adjudication narratives, SOPs with regulatory reference mapping, and study management plans — accelerating workflows while ensuring compliance.

CTROVE (Clinical Trial Management System)

Our in-house CTMS designed for real-world usability. CTROVE helps teams manage projects, sites, and timelines efficiently without the overhead of complex legacy systems. To be future-ready, CTROVE will integrate AI to enable smarter oversight, predictive insights, and workflow automation.

AI-Powered Vendor Selection Assistant

Automatically generates RFPs/RFIs and bid grids from protocols or synopses, standardizes vendor responses, and delivers weighted comparison summaries to support fair, efficient vendor selection.

Protocol and Regulatory Knowledge Assistant

and more in our Innovation Lab...

OUR APPROACH

Compliance-First | Proof-Driven | Human-in-the-Loop

"Whether you're looking to pilot an AI initiative or streamline trial operations, our team is ready to partner with you."
